

I respectfully urge the FCC to reject NAB's petition 04-160. Of course, I'm not sure how it can even be considered. I pay for the services similiar to paying for HBO. Isn't it the same thing? Your agency will spend a lot of time and money on consideration of this that will ultimately not be voted in by Congress, or be shot down by the Courts. Save us all \$\$\$ and quash this before it gets ridiculous.
